

Safe Routes to School

We are working with sustainable transport charity Sustrans to encourage our pupils to cycle, walk and scoot to school, which benefits their health and hopefully reduces congestion on the school run. Here is some information on how to find safe routes to school to incorporate more active travel.

[The National Cycle Network](#) – this is run by Sustrans, and the map shows the location of cycle paths

[Cycle Streets](#) – another website and app to help people plan cycling routes

[Travel Smart Surrey](#) – offers local residents and businesses information and paper maps on alternatives to car travel

[Brake](#) – the road safety charity has lots of information on travelling safely
